

Ports accessible at both front & rear, **preventing** the addition of a lockable lid

Optional **lockable lid** covering accessible ports

Ports accessible at both front & rear, **preventing** the addition of a lockable lid

Cheaper Range

Imperium® Range

Expensive Range

Central lifting eye on **weakest** part of the tank

Inconsistent weld quality could lead to failure & is aesthetically poor

Plastic vent caps can easily **crack** and **break** leading to water ingress

Non-standard, incompatible tanker connection

Removable top fittings plate, allowing users (**domestic & commercial**) access to the inner tank for inspection and maintenance

2" fill point with high-quality parallel threads, purpose-built to provide a **leak-free** tanker connection for improved environmental protection spillages

All tanks come with **full-length bearers** as standard

Aluminum vent cap, **lightweight, strong** and **non-corrosive**

High-quality welds - overall tank designed with fewer required welds

Two side lifting eyes for **stability** and **strength**

Steel caps, **stronger** but susceptible to **rust**

Central lifting eye on **weakest** part of the tank

High-quality welds

Non-standard, incompatible tanker connection
